Work Experience

Consilio – (Remote)   Dec. 2022 – Present
Senior Software Developer/Software Engineer

- Conduct support investigations for client-facing software in addition to updating and adding new features, for internal & external software platforms.
- Work in "sprints" to add new features and improve existing ones in "Sightline" - our web-based legal platform – which includes development in JavaScript, jQuery, ASP.NET MVC, and C#.
- Utilize SQL to assist Sightline with managing client related data; which includes writing and editing Stored Procedures.
- Assist L2 Support Team and Project Managers to provide solutions related to the efficiency of Sightline.

Robert Half Technology – (Remote)
Web Developer   Oct. 2022 – Dec. 2022

- Worked on a wide array of development projects for RHT clients.
- Technologies included: HTML, CSS, JavaScript, jQuery, React, JSX, Angular, TypeScript, Bootstrap, ASP.NET, node.js.

Spinutech, LLC – (Remote)
Web Developer   July 2021 – July 2022

- New development and maintenance of ASP.NET web applications including applications built using MVC and Webforms frameworks; languages that include C#, VB.NET, JavaScript (Vanilla and jQuery), HTML, VBScript, and razor; and MySQL and Microsoft SQL Server databases for data storage.
- Utilized Git and Subversion for Version Control.
- Developed custom solutions related to proprietary web-based CMS called "Spinternet."
- Coordinated with Project Managers to deliver products and solutions to clients.
- Collaborated with other developers/team members to improve efficiency and timely delivery of solutions.
- Wrote clean, consistent code matching established guidelines and patterns.
- Leveraged work, from website maintenance tasks to new development on existing sites, for several different clients and, delivered quality solutions within deadlines.

American Hotel Register Company – Vernon Hills, IL
Junior Web Developer   April 2018 – December 2018

- Assisted in new development and maintenance of ASP.NET MVC e-commerce website (C# as back-end).
- New development included implementing HTML forms with client-side and server-side validation, implementing asynchronous operations in controller, retrieving information (using ADO.NET Entity Data Models and LINQ) from SQL Server database, etc.
- Maintenance included product support by responding to user requests and investigating user concerns.
- Other tasks included code refactoring and adding comments in code files.

Sameer Rizvi

ACS Group – New Berlin, WI

Information Systems Specialist   October 2015 – March 2018

- Constructed a separate "Configurator" - an application that allows Sales and Engineering to configure any product offered by the company, generate quotes and sales orders - for each product offered by the company.
- Tested inside of Microsoft Dynamics which is the platform used to launch the "Configurator", while providing Microsoft Dynamics training to end users.
- Interacted, introduced, and reviewed requirements with Sales, Engineering and Production departments to ensure proper solution is delivered in a timely manner.

Parker Hannifin Corporation – Lincolnshire IL

Junior Web Developer   October 2014 – October 2015

- Built ASP.NET webforms application (C# for backend) for a Microsoft SQL Server database.
- Hosted web application on Windows Server 2012 via IIS.
- Designed barcode labels using Zebra Designer Pro software.
- Answered help desk tickets and addressed any technical employee concerns related to software and/or hardware.
